

1. Strontium chloride _____
2. Iron(III) chloride _____
3. sulfur(IV) oxide _____
4. Aluminum phosphide _____
5. Lead(IV) sulfide _____
6. hydrogen iodide _____
7. sodium telluride _____
8. Manganese(II) chloride _____
9. Cobalt(III) chloride _____
10. Nickel(II) oxide _____
11. Calcium Selenide _____
12. Copper(I) chloride _____
13. hydrogen selenide _____
14. Aluminum phosphide _____
15. Arsenic(III) chloride _____
16. Zinc oxide _____
17. Copper(I) iodide _____
18. Nickel(III) oxide _____
19. Rubidium iodide _____
20. hydrogen arsenide _____
21. magnesium bromide _____
22. aluminum oxide _____
23. nitrogen(III) oxide _____
24. Copper(II) nitride _____
25. K_3P _____
26. Iron(III) oxide _____
27. cuprous sulfide _____
28. Aluminum phosphide _____
29. Nickel(III) oxide _____
30. Lead(IV) oxide _____
31. hydrogen iodide _____
32. sodium phosphide _____
33. aluminum telluride _____
34. stannous fluoride (o for low) _____
35. calcium hydride _____
36. cobaltic chloride _____
37. lithium telluride _____
38. potassium sulfide _____
39. Nickel (III) oxide _____
40. iron (III) iodide _____
41. aluminum phosphide _____
42. scandium iodide _____
43. tin (II) sulfide _____
44. Aluminum fluoride _____
45. Aluminum chloride _____
46. Aluminum iodide _____
47. calcium bromide _____
48. hydrogen chloride _____
49. sodium oxide _____
50. phosphorus(V) fluoride _____
