

1. aluminum oxide _____
2. tin (IV) sulfide _____
3. calcium phosphate _____
4. nickel(II) hydroxide _____
5. Lead(II) nitrate _____
6. hydrogen bromide _____
7. hydrogen nitrate _____
8. aluminum sulfide _____
9. tin (II) sulfide _____
10. calcium phosphite _____
11. cobalt (III) hydroxide _____
12. hydrogen fluoride _____
13. Hydrogen nitrite _____
14. Nickel (III) acetate _____
15. iron (III) nitrate _____
16. aluminum phosphate _____
17. hydrogen selenate _____
18. tin (IV) Sulfide _____
19. Aluminum nitrate _____
20. Aluminum nitrite _____
21. Aluminum nitride _____
22. calcium hypoiodite _____
23. hydrogen chlorate _____
24. sodium acetate _____
25. sulfur hexafluoride _____
26. Iron(III) oxide _____
27. copper (II) sulfide _____
28. Aluminum phosphate _____
29. Nickel(III) hydroxide _____
30. lead (IV) nitrate _____
31. hydrogen iodide _____
32. hydrogen acetate _____
33. aluminum telluride _____
34. tin(IV) fluoride _____
35. calcium hydroxide _____
36. cobalt(III) cyanide _____
37. hydrogen telluride _____
38. hydrogen sulfate _____
39. Nickel (III) oxalate _____
40. iron (III) permanganate _____
41. aluminum phosphide _____
42. hydrogen hypoiodite _____
43. tin (II) sulfide _____
44. Aluminum periodate _____
45. Aluminum iodate _____
46. Aluminum iodide _____
47. calcium hypobromite _____
48. hydrochloric acid _____
49. sodium peroxide _____
50. phosphorus pentafluoride _____
